

SCOTT YACKZAN

Los Angeles, CA 94109 • 530-681-5024 • syackzan@gmail.com

Github Repository: <https://github.com/syackzan>

TECHNOLOGIES

High Proficiency: HTML, CSS, JavaScript, C++, Bootstrap, jQuery, jQuery Widgets, Moment.js, node.js

Learning: Node.js, ES6, OOO, Express.js, SQL, Python, React

PROJECTS

THE DEGENERATE – A Gamblers Quick Escape

Deployed Link - <https://syackzan.github.io/The-Degenerate/>

- A site that allows a user to quickly search for an upcoming sports game in the field of Football, Soccer, Baseball, or Basketball.
- The user is then able to place a bet on that sport with “Paper” Money currently.
- The Application required the use of fetching two separate API’s. One API provides all the details regarding odds of a sport and the other shows all the teams in a league.
- This application will likely be expanded upon to include additional sports and different live odds like spread and over/under.

WEATHER DASHBOARD – Find out the weather in any City

Deployed Link - <https://github.com/syackzan/Weather-Dashboard>

- Allows the user to search out a city in the U.S. and find the current weather along with a five-day forecast.
- Allows the user to store their searches in local storage. These searches are stored in buttons that when pressed quickly take you to the city that is saved.
- This program brings in the information from a Weather API.

POP CODING QUIZ – Pop Quiz to test some basic Coding Knowledge.

Deployed Link - <https://syackzan.github.io/Pop-Quiz-Coding-Basics/>

- Application allows user to take a Coding quiz.
- This quiz has five questions, and the user will be timed once the quiz starts.
- All the questions are dynamically loaded in JS with only a single index.html.
- If the user gets the question wrong, ten seconds is docked from the timer. At the end the user has the option to save their High Score to Local Storage for later viewing.
